

TIME & ATTENDANCE

Time Tracking, Simplified

Time & Attendance tackles the burden of tracking hourly employees, from time entry to approval, and everything in between.

Flexible Reporting Methods

Our flexible reporting methods support a variety of employees—whether they are in front of computers all day or on the go. Employees can record hours via computer, smartphone, and the TimeKeeper iPad app, and can assign their hours to specific project codes.

360-Degree Visibility

The Zenefits dashboard is your time-tracking HQ. See who's clocked in and out in real-time, view a snapshot of hours worked each pay period, and access an audit log of corrections made to time entries. Our pay period timeline keeps you on top of deadlines so nothing slips through the cracks.

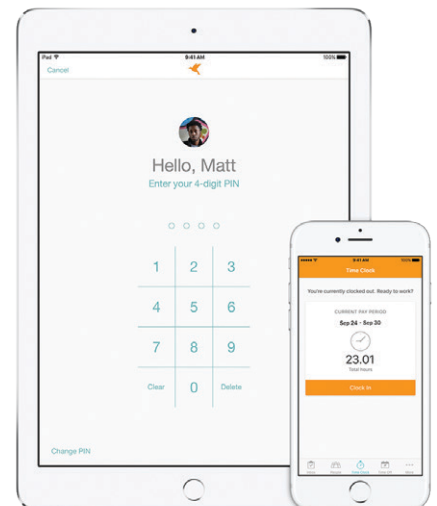

Minimize Compliance Risks

Enjoy built-in compliance with state overtime laws, no matter where you're located. Create custom rules to flag employees who forget to take meal breaks. And guard against fraud with our TimeKeeper iPad app, which snaps pictures of employees as they clock in and out.

Effortlessly Integrated

Hours automatically sync across connected apps—from payroll to ACA Compliance. And other Zenefits apps push relevant data, such as employment status and vacation time, back into Time & Attendance.
